Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Pages 5-12, filed 04/22/05, with respect to claims 24-27, 29-30 have been fully considered and are persuasive. The rejections of Claims 24-32 have been withdrawn.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 24-27, 29-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Saito et al (US 6,618,749)

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Regarding claim 24, which is representative of claim 30, Saito discloses a server apparatus connected with a transmitting facsimile apparatus and a receiving facsimile apparatus via the Internet (Fig 1), the server apparatus comprising', a memory 22,23 configured to store reception capabilities regarding a type of facsimile data that the receiving facsimile apparatus can receive, the reception capabilities being distinct from facsimile data (Fig 2); and a controller 21 configured to receive facsimile data from the transmitting facsimile apparatus, to transform the received facsimile data into a type of facsimile data that the receiving facsimile apparatus can receive, based on the

Art Unit: 2622

reception capabilities stored in the memory, and to transmit the transformed facsimile data to the receiving facsimile apparatus (Fig 2; Col 4 Lines 36-42; Col 5 Lines 49-57; ABSTRACT).

Considering claim 25, Saito teaches the server apparatus according to claim 24, wherein a reception capability regarding a type of facsimile data is a type of file data that the receiving facsimile apparatus can receive (Col 5 Lines 49-57).

Regarding claim 26, Saito discloses the server apparatus according to claim 25, wherein a type of file data is at least one of MH, MR, MMR and JPEG (Col 4 Lines 36-42).

Regarding claim 27, Saito teaches A server apparatus connected with a facsimile via the Internet (Fig 1-2), the server apparatus comprising', a memory 22,23 configured to store reception capabilities regarding a type of facsimile data that the facsimile apparatus can receive, the reception capabilities being distinct from facsimile data (Fig 2); and a controller configured to receive, from the facsimile apparatus, an e-mail With a predetermined address, the e-mail indicating the reception capabilities of the facsimile apparatus to be stored in the memory, the controller being further configured to store the capabilities of the facsimile apparatus in the memory (Col 5 Lines 10- 29; Col 8 Lines 50-Col 9 Line 18).

For claim 29, Saito discloses An internet facsimile apparatus connected with a server apparatus via the Internet (Fig 1-2), the Internet facsimile apparatus comprising', a communicator configured to communicate with a server apparatus via the Internet (Fig 1-2), and a controller configured to transmit to the server by e-mail, reception

capabilities regarding a type of facsimile data that the Internet facsimile apparatus can receive, the transmitted e-mail having a predetermined address, the e-mail indicating the reception capabilities of the Internet facsimile apparatus to be stored in the server apparatus (Col 5 Lines 10-29; Col 8 Lines 50- Col 9 Line 18).

Allowable Subject Matter

3. Claims 28,31-32 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 recites the limitation "facsimile data" in paragraph 2 and 3, lines 3 and 1, respectively. There is insufficient antecedent basis for this limitation in the claim.
